Application Tips:

- For using outdoor, installing the anti slip tape/stair tread when the outdoor temperature is above 50 degrees Fahrenheit (10 Celsius). Installed tape/stair tread can withstand temperature to 14 degrees Fahrenheit (-10 Celsius)
- Clean the smooth surface with wet towel thoroughly to ensure it is free from dust and grease. The surface should be dry and free from any loose particles before application. Prime and seal unpainted wood surfaces.
- Simply cut to the desired size and round the corners with scissors. Then peel away the paper of one end of the stripe and lay it to the step.
- To attain the optimum bond, sufficient pressure should be applied evenly to the surface, starting from the centre of the tape strip and work towards the ends.
- Use for all smooth surface, do not use on uneven surfaces. Bridging gaps also not recommended. For safest footing, space safety strips one to three inches apart.
